

**Media Statement – Update on outbreak at Bay Ridges Long Term Care Home – Pickering  
- Dr. Rhonda Collins, Chief Medical Officer, Revera**

April 12, 2021

Durham Public Health declared an outbreak of COVID-19 at Bay Ridges Long Term Care Home in Pickering on March 30 after one staff member tested positive for COVID-19 as part of ongoing staff surveillance testing. Since the outbreak was declared one staff member and one resident have tested positive for COVID-19. The staff member has since recovered, and the resident is in isolation in the home.

We are working very closely with Public Health officials and are following strict pandemic outbreak protocols and infection control practices. All residents are monitored twice daily for symptoms.

All staff are screened at the beginning and end of their shifts and are being cohorted to work in assigned resident areas. All staff are required to wear an appropriate mask and eye protection in the home.

Enhanced cleaning is being done at Bay Ridges. We frequently disinfect high touch surfaces like handrails and doors, common areas and staff rooms.

At the direction of Public Health, all residents in Dunmore Park home area are to remain in their rooms at all times. Individual recreation activities will be continued to maintain social engagement during this period of isolation.

Most Bay Ridges residents who consented to and are able to be vaccinated have now received both doses of the vaccine. Vaccinations for staff are ongoing.

We have informed the residents, their families and the staff of the status of the outbreak. Although general visits are suspended while the province is in lockdown, visits from essential caregivers and essential visits for palliative residents will be permitted.

Revera continues to do everything we can to keep our residents and employees safe as we work to prevent the spread of COVID-19 at our long term care homes and retirement residences.
