

**Media Statement – Update on COVID-19 Outbreak at Charleswood Care Centre – Winnipeg  
- Dr. Rhonda Collins, Chief Medical Officer, Revera**

December 10, 2020

Winnipeg Regional Health Authority declared an outbreak of COVID-19 at Charleswood Care Centre in Winnipeg on November 20. Since that time, 72 residents and 37 staff members have tested positive for COVID-19. The residents are in isolation in their room. The staff members are in self-isolation at home. 22 residents and 6 employees have recovered.

We are deeply saddened to report that 19 residents have passed away due to COVID-19. Our hearts and deep sympathies go out to all the family, friends and communities who have lost a loved one.

We are working very closely with Public Health officials and are following pandemic outbreak protocols and infection control practices. All residents are monitored twice daily for symptoms.

All staff are screened at the beginning and end of their shifts and are being cohorted to work in assigned resident areas. All staff are required to wear an appropriate mask and eye protection in the home.

Enhanced cleaning is being done at Charleswood Care Centre. We are frequently disinfecting high touch surfaces like handrails and doors, resident rooms, common areas and staff rooms.

At the direction of Winnipeg Regional Health Authority, all residents are to remain in their rooms at all times. One on one recreation activities will be continued to maintain social engagement during this period of isolation.

We have informed the residents, their families and the staff of the status of the outbreak. At the direction of Public Health, all indoor and outdoor visits are cancelled temporarily. Designated family/support person visits and essential visits for palliative residents will be permitted.

Revera continues to do everything we can to keep our residents and employees safe as we work to prevent the spread of COVID-19 at our long term care homes and retirement residences.
