

**Media Statement – Update on outbreak at Donway Place Retirement Residence – Toronto
- Dr. Rhonda Collins, Chief Medical Officer, Revera**

January 19, 2021

Since Toronto Public Health declared an outbreak of COVID-19 at Donway Place retirement residence on December 14, we have received confirmation that 81 residents and 37 staff have tested positive for COVID-19. To date, 49 residents and 31 staff members have recovered. We regret to confirm that 19 residents have passed away with COVID-19 during the outbreak. The team at Donway Place offers its most sincere condolences to the families and friends of the residents who passed away during the pandemic.

We continue to work closely with Toronto Public Health officials and are following our pandemic outbreak protocols and infection control practices. Residents are isolated in their rooms and monitored for symptoms twice daily. All staff are screened at the beginning and end of their shifts and are required to wear a surgical mask and eye protection in the residence at all times.

We are doing enhanced cleaning at Donway Place, disinfecting high touch surfaces like handrails and doors, resident rooms, common areas and staff rooms frequently.

To promote physical distancing, residents are being served meals in their rooms. Group recreation programming has been replaced by individual recreation activities with residents for social engagement.

We have informed residents, their families and the staff of the status of the outbreak. Visits have been cancelled during the outbreak, except for essential visitors. We appreciate the patience and understanding of our residents and their families as we take these precautions. After the outbreak is resolved, we will notify families as soon as we are able to resume visits.

Revera continues to do everything we can to keep our residents and employees safe as we work to prevent the spread of COVID-19 at our retirement residences and long term care homes.
