

**Media Statement – Update on Valleyview Care Centre – Brandon
- Dr. Rhonda Collins, Chief Medical Officer, Revera**

March 9, 2021

Prairie Mountain Health has confirmed that no additional residents or staff of Valleyview Care Centre in Brandon have tested positive for COVID-19 since the outbreak was declared on February 16 when one staff member tested positive. That case has since resolved.

We are working closely with Prairie Mountain Health officials and are maintaining pandemic outbreak protocols and infection control practices. We are doing enhanced cleaning at Valleyview, frequently disinfecting high touch surfaces like handrails and doors, common areas and staff rooms.

All residents are monitored closely for symptoms twice daily and are tested if they present any potential signs or symptoms of the virus.

Staff are screened at the beginning and end of their shifts. All staff are required to wear an appropriate mask and eye protection while in the home.

All Valleyview residents who consented and were able to be vaccinated have received their second dose. Vaccinations for staff are underway.

We are regularly updating residents, their families and staff on the status of the outbreak. At the direction of Public Health, visits are restricted designated family caregivers and essential visits for palliative residents.

We recognize how difficult these measures are for residents and their families and we appreciate their patience and understanding as we put these precautions in place for the safety of our residents.

Revera continues to do everything we can to keep our residents and employees safe as we work to prevent the spread of COVID-19 at our long term care homes and retirement residences.
