

**Media Statement – Update on Bradgate Arms Retirement Residence - Toronto
- Dr. Rhonda Collins, Chief Medical Officer, Revera**

May 9, 2020

We have now received confirmation that 15 residents of Bradgate Arms Retirement Residence in Toronto have tested positive for COVID-19. Two residents have recovered and the others are in isolation in their suites. A total of 11 staff members have tested positive. Four employees have recovered and the rest are in self-isolation at home.

We regret to confirm that three residents of Bradgate Arms have passed away with COVID-19. We offer our most sincere condolences to the families and friends of the people we have lost to this pandemic.

We continue to work closely with Toronto Public Health officials and are following pandemic outbreak protocols and infection control practices. All residents are monitored closely for symptoms daily and all staff are screened at the beginning and end of their shifts. Staff providing care for residents in isolation (positive or symptomatic) wear appropriate personal protective equipment (PPE) which includes a mask, face shield, gloves and gown. All staff are required to wear a surgical mask in the residence at all times.

We are doing enhanced cleaning at Bradgate Arms, disinfecting high touch surfaces like handrails and doors, resident rooms, common areas, and staff rooms more frequently.

To promote physical distancing, residents are being served their meals in their suites. Group recreation programming has been replaced by one-on-one activities with residents for social engagement.

We continue to reach out to all families of residents as often as possible to provide updates on their loved ones during this time of physical isolation.

Revera continues to do everything we can to keep our residents and employees safe as we work to prevent the spread of COVID-19 at our retirement residences and long term care homes.
