

Media Statement – Update on outbreak at Carlingview Manor - Dr. Rhonda Collins, Chief Medical Officer, Revera

April 14, 2020

We received confirmation from Ottawa Public Health that 7 residents and 7 staff members of Carlingview Manor in Ottawa are confirmed to have tested positive for COVID-19. The residents who have tested positive are in isolation.

The entire home has been in outbreak status since the first staff member tested positive last week. The staff members are self-isolating at home. We are working closely with Ottawa Public Health officials and are following strict pandemic outbreak protocols and infection control practices. All staff providing care for residents in isolation (positive or symptomatic) must wear full personal protective equipment (PPE) which includes a mask, face shield, gloves and gown, while providing care. All staff wear a surgical mask in the home at all times.

We continue to do enhanced cleaning at Carlingview Manor. High touch surfaces like handrails and doors, and resident rooms, common areas, staff rooms are receiving more frequent cleaning.

We have adjusted our mealtime and recreation activities to promote physical distancing. Meals for residents in isolation are served on an over-bed tray in their rooms. The other residents are served meals at multiple seatings in dining rooms to maximize physical distancing while allowing the staff to provide supervision and assistance as required. Group recreation programs have been replaced by one-on-one activities to maintain social engagement.

We have informed residents, their families and the staff on the status of the outbreak. We will continue to reach out to all families of residents as often as possible to provide updates on their loved ones during this time of physical isolation.

Revera continues to do everything we can to keep our residents and employees safe as we work to prevent the spread of COVID-19 at our long term care homes and retirement residences.
