

**Media Statement – Update on Main Street Terrace Long Term Care Home – Toronto
- Dr. Rhonda Collins, Chief Medical Officer, Revera**

May 11, 2020

To date, one resident of Main Street Terrace Long Term Care Home in Toronto has tested positive for COVID-19 and is in hospital. None of the staff have tested positive for COVID-19.

We are working closely with Toronto Public Health officials who have tested all residents and most staff for COVID-19. All the test results have been negative except for one resident.

We will remain vigilant and will continue to follow pandemic outbreak protocols and infection control practices. All residents are monitored closely for symptoms and all staff are screened at the beginning and end of their shift. All staff providing care for residents in isolation (positive or symptomatic) must wear appropriate personal protective equipment (PPE) which includes a mask, face shield, gloves and gown. All staff are required to wear a surgical mask in the residence at all times.

We continue to do enhanced cleaning at Main Street Terrace, disinfecting high touch surfaces like handrails and doors, resident rooms, common areas, and staff rooms more frequently.

We have adjusted our mealtime and recreation activities to promote physical distancing. All residents in isolation are served meals in their rooms. We have structured our dining service to maximize physical distancing during mealtime, while allowing the staff to provide supervision and assistance as required. Group recreation programs have been replaced by one-on-one activities to maintain social engagement.

We are reaching out to all families of residents as often as possible to provide updates on their loved ones during this time of physical isolation.

Revera continues to do everything we can to keep our residents and employees safe as we work to prevent the spread of COVID-19 at our long term care homes and retirement residences.
