

**Media Statement –Outbreak at Riverbend Place Retirement Residence – Cambridge
- Dr. Rhonda Collins, Chief Medical Officer, Revera**

May 22, 2020

We received confirmation on May 22 that one resident of Riverbend Place Retirement Residence in Cambridge tested positive for COVID-19. The resident who tested positive is in isolation in their suite. This outbreak does not affect Riverbend Long Term Care Home.

We are working closely with Region of Waterloo Public Health officials and are following pandemic outbreak protocols and infection control practices. All residents are monitored closely for symptoms and all staff are screened at the beginning and end of their shifts. Staff providing care for residents in isolation (positive or symptomatic) wear appropriate personal protective equipment (PPE) which includes a mask, face shield, gloves and gown. All staff are required to wear a surgical mask in the residence at all times.

We are doing enhanced cleaning at the Riverbend Place, disinfecting high touch surfaces like handrails and doors, resident rooms, common areas, and staff rooms more frequently.

To promote physical distancing, residents are being served their meals in their suites. Group recreation programming has been replaced by one-on-one activities with residents for social engagement.

We have notified all residents, families and staff and will reach out to all families of residents as often as possible to provide updates on their loved ones during this time of physical isolation.

Revera continues to do everything we can to keep our residents and employees safe as we work to prevent the spread of COVID-19 at our retirement residences and long term care homes.
