

**Media Statement – Update on The Claremont Retirement Residence - Toronto  
- Dr. Rhonda Collins, Chief Medical Officer, Revera**

April 17, 2020

We received confirmation on April 12 that one staff member of The Claremont Retirement Residence in Toronto tested positive for COVID-19. The staff member who tested positive is in self-isolation at home.

We are working closely with public health officials and are following strict infection control practices. All staff providing care for residents in isolation (positive or symptomatic) must wear full personal protective equipment (PPE) which includes a mask, face shield, gloves and gown. All staff have been directed to wear a surgical mask in the home at all times.

With the guidance and support of Toronto Public Health, as part of their ‘whole home’ approach to COVID-19 testing, all residents of The Claremont will be swabbed proactively this week to ensure there has been no spread of COVID-19 in the residence.

We continue to do enhanced cleaning at The Claremont. High touch areas like doors and handrails are receiving more frequent cleaning. Common areas and staff rooms are being disinfected using a Clorox 360 Disinfectant Cleaner system.

To promote physical distancing, residents are being served their meals in their suites. Group recreation programming has been replaced by one-on-one activities with residents for social engagement.

We continue to reach out to all families of residents as often as possible to provide updates on their loved ones during this time of physical isolation.

Revera continues to do everything we can to keep our residents and employees safe as we work to prevent the spread of COVID-19 at our retirement residences.
