

**Media Statement – Update on The Claremont Retirement Residence - Toronto  
- Dr. Rhonda Collins, Chief Medical Officer, Revera**

April 24, 2020

We received confirmation that two residents and two staff members of The Claremont Retirement Residence in Toronto have tested positive for COVID-19. The residents are in isolation. The staff members are in isolation at home.

With the guidance and support of Toronto Public Health, as part of their ‘whole home’ approach to COVID-19 testing, all residents of The Claremont are being swabbed proactively to ensure there has been no spread of COVID-19 in the residence.

We are working closely with Toronto Public Health officials and are following pandemic outbreak protocols and infection control practices. All residents are monitored closely for symptoms and all staff are screened at the beginning and end of their shifts. Staff providing care for residents in isolation (positive or symptomatic) wear appropriate personal protective equipment (PPE) which includes a mask, face shield, gloves and gown. All staff are required to wear a surgical mask in the residence at all times.

We continue to do enhanced cleaning at The Claremont, disinfecting high touch surfaces like handrails and doors, resident rooms, common areas, and staff rooms more frequently.

To promote physical distancing, residents are being served their meals in their suites. Group recreation programming has been replaced by one-on-one activities with residents for social engagement.

We continue to reach out to all families of residents as often as possible to provide updates on their loved ones during this time of physical isolation.

Revera continues to do everything we can to keep our residents and employees safe as we work to prevent the spread of COVID-19 at our retirement residences and long term care homes.
