

**Media Statement – Update on outbreak at Jasper Place Long Term Care Home – Edmonton  
- Dr. Rhonda Collins, Chief Medical Officer, Revera**

November 25, 2020

Alberta Health Services (AHS) has confirmed that three residents of Jasper Place Long Term Care Home have tested positive for COVID-19 since the outbreak began on October 23, 2020. Two of these residents have recovered.

AHS also confirmed since the outbreak began, nine staff have tested positive for COVID-19. Six of these staff members have recovered and returned to work, the rest remain at home in self-isolation.

We are working very closely with AHS Public Health officials and are following pandemic outbreak protocols and infection control practices. All residents are monitored twice daily for symptoms.

All staff are screened at the beginning and end of their shifts and are being cohorted to work in assigned resident areas. All staff are required to wear an appropriate mask and eye protection in the home.

Enhanced cleaning is being done at Jasper Place. We are frequently disinfecting high touch surfaces like handrails and doors, resident rooms, common areas and staff rooms.

All residents are in isolation, cohorted to their designated home area. One on one recreation activities will continue, to maintain social engagement during this period of isolation.

We have informed the residents, their families and the staff of the status of the outbreak. At the direction of Public Health, all indoor and outdoor visits are cancelled temporarily. Essential caregiver visits and essential visits for palliative residents will be permitted.

We recognize how difficult these measures are for residents and their families. We appreciate the patience and understanding of families as we put these precautions in place for the safety of the residents.

Revera continues to do everything we can to keep our residents and employees safe as we work to prevent the spread of COVID-19 at our long term care homes and retirement residences.
