

**Media Statement – Update on outbreak at Maples Personal Care Home – Winnipeg
- Dr. Rhonda Collins, Chief Medical Officer, Revera**

November 25, 2020

Winnipeg Regional Health Authority confirms that, as of today, 148 residents have tested positive for COVID-19 and there are 17 active cases. We regret to confirm that 46 residents of Maples have passed away with COVID-19, as announced by the province. Our team grieves alongside the families and friends of these residents, and we send them our heartfelt sympathies.

Maples has had 60 staff members test positive for COVID-19. Of these, 16 staff members have active cases of COVID-19 and are self-isolating in their homes.

Canadian Red Cross Update

Revera is very grateful for the support we are receiving from the Canadian Red Cross team at Maples. Since November 15, they have been assisting our team with light housekeeping, companionship and other tasks. The Canadian Red Cross team includes support aides and an occupational health and safety advisor and site manager.

We continue to work closely with Winnipeg Regional Health Authority (WRHA) officials, including Kathleen Klaasen, who is overseeing the administration of the home. We are maintaining pandemic outbreak protocols and infection control practices. All residents in the home are isolated in their rooms and are monitored closely for symptoms twice daily. All staff are screened at the beginning and end of their shift and wear the appropriate personal protective equipment while in the home. Staff are cohorted to provide care for areas with residents who tested negative or positive.

We are doing enhanced cleaning, frequently disinfecting high touch surfaces like handrails and doors, resident rooms, common areas and staff rooms. Individual recreation activities continue to maintain stimulation and social engagement during this period of isolation. Virtual visits can be arranged through the recreation team.

We are updating residents, their families and the staff on the status of the outbreak and are providing regular phone, email and automated voicemail message updates and conducting virtual town halls. We understand that this is a very stressful time for residents, their families and our staff and we are doing everything we can to control the spread of COVID-19 in the home.
