

**Media Statement – Update on outbreak at Mount Royal Care Centre – Calgary  
- Dr. Rhonda Collins, Chief Medical Officer, Revera**

October 29, 2020

Alberta Health Services (AHS) confirmed today that 30 residents of Mount Royal Care Centre in Calgary have tested positive for COVID-19 since the outbreak began on October 18. Ten staff members have tested positive and are at home in self-isolation. We regret to confirm that two residents have passed away with COVID-19. The team at Mount Royal offers their most sincere condolences to the families and friends of the people who were lost to the pandemic.

We are working closely with Alberta Health Services officials and have implemented pandemic outbreak protocols and enhanced infection control practices. All residents are monitored closely for symptoms twice daily. All staff are screened at the beginning and end of their shifts and are being cohorted to assigned areas. Staff are required to wear an appropriate mask and eye protection in the home.

Enhanced cleaning is being done at Mount Royal. We are disinfecting high touch surfaces like handrails and doors, resident rooms, common areas and staff rooms frequently.

Contact tracing and testing of residents and staff will continue to take place at the direction of Alberta Health Services. One on one recreation activities will be continued to maintain social engagement.

We will continue to provide updates for residents, their families and staff regarding the status of the outbreak. At the direction of Public Health, visits are on hold except for essential visits.

Revera continues to do everything we can to keep our residents and employees safe as we work to prevent the spread of COVID-19 at our long term care homes and retirement residences.
