

Media Statement – Update on Bow Crest Long Term Care Home – Calgary
- Dr. Rhonda Collins, Chief Medical Officer, Revera

September 8, 2021

Alberta Health Services (AHS) has confirmed that two staff members of Bow Crest Long Term Care Home in Calgary have tested positive for COVID-19 since the outbreak began on August 28. At the direction of AHS, all residents and staff on the affected home area were tested. All results have returned negative.

We are working closely with AHS officials and are maintaining pandemic outbreak protocols and infection control practices. We are doing enhanced cleaning at Bow Crest, frequently disinfecting high touch surfaces like handrails and doors, common areas and staff rooms.

All residents are monitored closely for symptoms twice daily and are tested if they present any potential signs or symptoms of the virus.

Staff are screened at the beginning of their shifts. All staff are required to wear an appropriate mask and eye protection while in the home.

Most Bow Crest residents and staff are now fully vaccinated. Vaccinations for the remaining residents and staff are ongoing.

We are regularly updating residents, their families and staff on the status of the outbreak.

Revera continues to do everything we can to keep our residents and employees safe as we work to prevent the spread of COVID-19 at our long term care homes and retirement residences.
